

International Hospital

Location : South Maldives

Features

The project provides an opportunity for establishing an international hospital targeting both local and foreign residents

Rationale

The project is intended to reinforce the government's regional development strategy of focusing development in two regional centers. The rationale for the project is the lack of adequate medical facilities in the south of Maldives, which implies that a significant number of Maldivian nationals regularly travel to neighboring countries for medical treatment.

The project provides an opportunity for creating a hospital with advanced medical facilities with specialist services to cater to local and foreign residents. In addition, with the expansion of tourism in the south of Maldives, the project has the scope of introducing “medical tourism” to the already successful tourism product of the Maldives.

Location

Gan, Addu Atoll

Features

To be proposed by the investor on completion of market analysis.

Business model

Built-Operate-Transfer or Joint Venture.

Time frame

1 to 3 years
